

Spotted Wing Drosophila (SWD) Monitoring Report for Southern Interior Valleys of British Columbia

More than 180 traps have been set up throughout the Okanagan, Similkameen and Creston Valleys in cherries and other stone fruit, berries and grapes. Traps for monitoring SWD can be purchased from Growers Supply Co. Ltd.

June 3 - June 9, 2011

No Spotted Wing Drosophila flies were caught in the Southern Interior Valleys of B.C.

Check the following link for management recommendations for spotted wing drosophila in tree fruit and grapes: <http://www.agf.gov.bc.ca/cropprot/swd.pdf>

Please read and follow label directions. Emergency registration labels are posted at http://www.al.gov.bc.ca/pesticides/k_4.htm#2

Check the following link for management recommendations for berries:
