

Are you interested in testing new tree fruit varieties?

SVC is looking for growers who are interested in testing new varieties of apples and sweet cherries.

The advantages of being a grower tester include:

- First-hand experience growing the newest apple and cherry selections
- Mature trees when the new varieties are commercialized
- Up-to-date information on the most competitive varieties in the tree fruit industry
- Supporting horticultural information that will be based on your orchards when the new varieties are commercialized

Each grower tester must meet the following requirements:

- Current BCFGGA membership
- In good standing with SVC, which includes an orchard audit, payment of all royalties and a signed Grower Agreement
- Recognized as a top grower
- Committed to testing for a 10-year period
- Willing to complete regular on-line surveys about test trees

If you are interested, please contact Graham Karner at graham@summerlandvarieties.com or 778-516-8016
